Conservation Plans for Projects Using Offsite Nutrient Credits

A conservation plan meeting the conditions and requirements of Letter to Industry 11-06 may be submitted in lieu of an infill grading plan. In situations where stormwater quality compliance is required, offsite nutrient credits may be purchased to provide compliance. A letter of credit availability must accompany the first plan submittal. Alternatively, evidence of a credit purchase can be included on the initial submittal. An infill grading plan is required if BMPs other than offsite nutrient credits will be used for stormwater quality compliance.

For more information on conservation plans, please see [Letter to Industry 11-06](#).

If you have any questions regarding the water quality requirements for conservation plans, please contact the Site Development and Inspections Division at **703-324-1720, TTY 711**.
